

PRAGYA PANDEY

Dehradun, Uttarakhand, India | pandeypragya330@gmail.com | +91 7906501741 | [GitHub](#) | [LinkedIn](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in full-stack development, machine learning, and open-source contributions, seeking Software Engineering Intern / SDE Intern opportunities. AWS Certified Cloud Practitioner with a track record of applying problem-solving skills to build and ship real-world projects using Python, C++, React, and Node.js, and contributing to team-based technical initiatives.

EDUCATION

Graphic Era Hill University — Bhimtal, India

Candidate for Bachelor of Technology in Computer Science & Engineering — Expected May 2027 | CGPA: 7.88 / 10

TECHNICAL SKILLS

- **Languages:** C++, Python, JavaScript, HTML/CSS, SQL
- **Machine Learning & Deep Learning:** PyTorch, NumPy, Mixture of Experts (MoE), Sparse Routing, Transformers
- **Full-Stack Development:** React.js, Node.js, Express.js, MongoDB, Socket.io, Tailwind CSS, Bootstrap, MySQL, RESTful APIs
- **Cloud & Tools:** AWS, Git/GitHub, VS Code, Linux
- **Core CS:** Data Structures & Algorithms, Dynamic Programming, DBMS, Operating Systems, System Design fundamentals

CERTIFICATIONS

- AWS Certified Cloud Practitioner — Amazon Web Services
- Full-Stack Web Development Certification (A+ Grade) — React.js & Node.js backend architecture

PROJECTS

Mixture of Experts (MoE) Layer — PyTorch Implementation 2026

PyTorch, Python

- Implemented a sparse Mixture-of-Experts layer with top-k softmax gating for selective token activation, applying transformer-based routing concepts.
- Debugged and resolved dimension-mismatch errors and added an auxiliary load-balancing loss to improve expert routing efficiency.

PyTorch Optimizer — Open-Source Contribution 2026

PyTorch, Python

- Implemented an Exponential Learning Rate Scheduler with linear warmup for an open-source PyTorch optimizer/scheduler library, including parameter validation for the decay rate.
- Integrated the new scheduler into the existing scheduler framework, updated the scheduler registry, added a usage example, and extended the test suite.
- Verified correctness by passing the project's automated test suite; contributed via the standard fork → commit → push → pull request workflow.

Real-Time Chat Application 2025

React, Node.js, Socket.io, CSS | [GitHub: github.com/PragyaPandey5](#)

- Built a live messaging platform using WebSockets (Socket.io) to deliver sub-100ms message latency between connected users.
- Implemented real-time presence tracking, automated timestamps, and persistent chat history storage in MongoDB.

Personal Budget Tracker — FinTech Dashboard 2025

React, Chart.js, Tailwind CSS

- Developed a financial dashboard with dynamic income/expense visualizations and live balance calculations using Chart.js.
- Used React Hooks and Context API to manage application state, enabling instant recalculation without page reloads.

EXPERIENCE & LEADERSHIP

Team Lead — Static Code Analyser Jan 2026 – Mar 2026

Graphic Era Hill University Fest

- Led a team of 4 to build a parsing engine for static code analysis, improving analysis efficiency by 30%.
- Coordinated task delegation, code reviews, and sprint delivery to meet competitive event timelines.

Peer Mentor — Data Structures & Algorithms 2025

Graphic Era Hill University

- Mentored 20 junior students in DSA through weekly doubt-clearing sessions and curated LeetCode problem sets.
- Improved class test averages by 15% through structured practice plans and consistent progress tracking.

Event Coordinator 2024 – Present

Graphic Era Hill University

- Coordinated logistics and led cross-functional planning for university technical events with 500+ attendees.
